

Wolfgang Westdorp, Writer & Producer

Passionate writer, video game producer, and a certified Scrum Master looking to collaborate with a like-minded design team.

Stakes -Scrum Master + Writer + Lead Designer.

September 2024 - May 2025.

A comedy/ mystery visual novel demo that I led development on as a combination Scrum Master, Writer, and Lead Designer: writing dialogue, creating outlines with numerous outcomes and checks, and communicating between the other members of the team, not only my progress but also the goals of each sprint.

Tools used: Google Suite, Jira, Discord, Ren'Py.

Lane Casters -Scrum Master + Writer.

January 2025 - May 2025

An arcade bowling game where the player is pitted against a series of cheating wizards. This was created over a three-month-long Game Jam, where I owned the schedule, managed the backlog, and communicated tasks to others. I also wrote and designed a secondary gameplay loop, which was unfortunately cut to make the deadline.

Tools used: Celtx, Trello, Discord, RPG Maker.

The Spark Of Life -Lead Writer.

June 2019 - August 2022

Wrote, designed, and outlined the entirety of the game's narrative elements. Working closely with the product owner to ensure his overall vision for the project and to adhere to certain set pieces already developed by the game designers.

Tools used: Celtx and Google Suite.

Adventure Inc. -Producer and Head Editor.

May 2020 - November 2021

Worked collaboratively across a team of UI Designers, web developers, writers, and Dungeon Masters to manage a DM for hire website. Where you could rent available DMs or buy original prewritten modules for D&D 5th Edition, making me familiar with Wizards of the Coast's OGL and other similar licenses.

Tools used: Trello, Discord, Google Suite, Slab, WordPress.
